DriverTech™ Provides In-Cab Scanning Solution Using ACS TripPak SERVICES™

Salt Lake City, Utah, October 22, 2007 – DriverTech today announced the launch of InCab Scanning, as an additional application to their extensive suite of software services. Through an agreement with ACS TripPak SERVICES™, DriverTech now offers InCab Scanning, part of ACS' Capture ANYWARE™ program.

"InCab Scanning provides drivers yet another option to advance their paperwork so that it can be processed quickly and efficiently," said Kelley Walkup, vice president and general manager of ACS Expedited Solutions, providers of TripPak SERVICES™. "This flexible innovation remotely captures important documents and processes them as directed, boosting convenience, accessibility and affordability for all users."

"The ability to scan documents in the cab of the truck provides carriers with a significant operational efficiency that speeds up receivable collection and driver settlement", said Mark Haslam, CEO and President of DriverTech. "Through advantages like "incab" scanning, carriers are beginning to experience the operational improvements available with a powerful computing platform in the cab of the truck and lower communication costs. Because documents are scanned "in cab," using proven DriverTech technology, they are easily integrated with other TripPak SERVICES™."

About TripPak SERVICES™
